ABOUT THE CARDANO GOLD TOKEN

- The Cardano Gold Token is a new, cost-effective and future-proof way of investing in fine physical gold (ticker: **CGOLD**).
- A digital asset in the form of a cryptographic token, secured by **1/100 gram of 100% fine gold** per CGOLD, stored in Switzerland.
- A unique institutional-grade product, created in partnership with a leading Swiss precious-metals vaulting provider.
- Available for purchase using **USDCx** on Minswap (Cardano DEX).

WHY INVEST IN CGOLD?

01 Store of Value

Gold has historically preserved wealth across generations, maintaining purchasing power through changing economic cycles. As both an **inflation hedge** and a **safe-haven asset**, gold tends to retain or increase its value during periods of market volatility or geopolitical uncertainty. CGOLD makes this time-tested asset accessible through the efficiency of blockchain technology.

02 24/7 Liquidity

CGOLD is tradable anytime and anywhere through decentralized exchanges (DEXs), ensuring continuous secondary-market liquidity. In addition, holders can use CGOLD on the lending platform to access decentralized lending and borrowing services — adding utility beyond traditional gold ownership.

03 Highly Secure and Fully Backed

Each CGOLD token is backed **1:1 by physical gold**. The underlying gold reserves are securely stored in regulated custody facilities, with holdings independently verified and audited at regular intervals.

04 Open and Inclusive Access

Through the Cardano blockchain, CGOLD gives anyone open access to hold and transact tokenized gold securely — without the barriers, intermediaries, or costs of traditional gold markets.

05 Cost-Efficient Ownership

Compared to conventional gold investment products, CGOLD offers **significantly lower costs of ownership**. It removes the need for physical storage, transportation, and insurance, while also reducing the carbon footprint associated with gold's traditional supply chain.

KEY FACTS

Name	Cardano Gold Token
Ticker symbol	CGOLD
Underlying	Physical gold
Issue currency	Gold spot price
Blockchain	Cardano
Token standard	Cardano Native Token
Ratio	1/100 gram gold per token
Reference price	LBMA Gold Price (XAU in USD)
Trading place	Minswap (DEX on Cardano)
Custody fee	0.00% p.a.
Physical delivery	Available under certain conditions

UNDERLYING PERFORMANCE

Gold price in USD per kilo

RISKS

Swiss legislation enforces the highest compliance standards for the origin and quality of the gold processed in Switzerland. There is no issuer or counterparty risk, as each CGOLD is secured by 1/100 gram of physical gold and the gold custodian conducts frequent reviews of the gold holding balance at the partner refineries. Gold is subject to considerable fluctuations in value.
